

Ericsson G30

Fixed Wireless Terminal
for GSM Networks

YOU WANT TO ADD TRAFFIC
TO YOUR GSM NETWORK
AND HELP BUSINESSES
OPTIMIZE THEIR
TELEPHONY COSTS.

PEOPLE ARE ON THE MOVE,
KEEPING IN TOUCH IS
INCREASING BUSINESSES
TELEPHONY COSTS.

THIS IS THE ERICSSON
SOLUTION TO YOUR
PROBLEM.

Astounding

The Ericsson – G30 terminal – is the natural choice for residential communication needs. It offers a highly cost efficient and flexible solution utilizing an existing GSM network, especially in locations that lack fixed communication infrastructure. With the crisp voice quality equivalent to that of a standard fixed line.

Simple

With the G30 terminal you have access to both fixed and wireless services. Amongst the services available through the GSM network are; Prepaid subscription, Calling Line Identification, etc. Thanks to the simplicity of the G30 terminal, the installation can be carried out with ease. Last but not least, the G30 terminal features Remote Management capabilities that enables monitoring and management of the unit from a location of your convenience.
